limjiahao got 3/5 correct on this day!

- NBA games normally scheduled from 12pm ET to 10:30pm ET, ending around 1am ET
(translated: 1am SG/HK to 11:30am SG/HK, ending around 2pm SG/HK)
- Window from 3pm - 12am SG/HK to input predictions
- At 12am, close submission of predictions
- At 3pm, the next day, retrieve prev day's game scores from API and update API
- Also get today's games and add to DB, open submission of predictions

Concerns:

- How to schedule jobs?
 - ↳ retrieve from API, update scores in games table and guesses tally in users table
- How to close submissions at 12am?
 - ↳ ensure also user who stays on the page e.g. 11:59pm can't submit post 12
- Live update?
 - ↳ retrieve from API at more regular intervals
 - ↳ how does ESPN/Google etc do it
